MODERNIZING OUR NUCLEAR DETERRENT:

- **Upgrading NNSA Infrastructure:** Establishes a new process for the National Nuclear Security Administration (NNSA) to plan for long-term infrastructure modernization goals outlined in the Enterprise Blueprint.
- **Expanding Combatant Command Innovation Authority:** Extends experimentation and prototyping authority to all combatant commands, including U.S. Strategic Command (STRATCOM).
- **Preserving ICBM Force Structure:** Makes permanent the requirement to deploy at least 400 ICBMs across no fewer than 450 launch facilities.
- **Accelerating SLCM Capability:** Accelerates the Nuclear Sea-Launch Cruise Missile (SLCM-N) program by two years.
- **Improving Safety of Launch Facilities:** Codifies a requirement for deep cleaning of ICBM launch control centers every five years.
- **Accounting for Air and Missile Defense Needs:** Includes air and missile defense interceptors in the Department of Defense's (DoD) unconstrained total munitions requirements list.
- **Sustaining MMIII Operations:** Requires the Air Force to create a strategy to sustain Minuteman III (MMIII) until Sentinel is emplaced.
- **Creating NNSA Rapid Capabilities Program:** Establishes a rapid capabilities program within NNSA to accelerate innovation and deployment.
- **Assessing Heavy Launch Site Viability:** Directs a DoD study on the capacity and sustainability of heavy and super heavy launch sites at Cape Canaveral and Vandenberg, and on potential alternative locations.
- **Authorizing over $3.8 billion in investments to the Sentinel program.**
- **Authorizing $50 million** for the NNSA to develop the SLCM-N warhead.
- **Authorizing $210 million** for Navy to develop the SLCM.
- **Authorizing $15 million** in investments to the Nuclear Command, Control, and Communications (NC3) Rapid Engineering Architecture Collaboration Hub (REACH) program.
